

Trackwork Moll has been awarded a ten year, high volume contract by Network Rail for the manufacture and supply of high quality, pre-stressed concrete railway sleepers. The sleepers will be produced in a new, highly automated factory which has been built in Doncaster. The factory has a production capacity of more than 400,000 sleepers per year and the supply of sleepers to Network Rail will commence this month. Trackwork Moll has a vacancy for a:

Concrete Laboratory Technician

Reporting to the laboratory supervisor, this position will:

- Carry out all tests according to the British and Network Rail Standards, i.e. compressive strength, flexural strength, grading, moisture content, viscosity, etc.
- Take samples of incoming raw materials.
- Perform tests to make improve the concrete mix design.
- Support the Quality Manager, report to the lab supervisor.

This is a great opportunity to join a young company, which has excellent business prospects. Candidates must:

- Have experience in the concrete, cement, or aggregate industries.
- Be available for a two-shift system and weekend work.
- Be a punctual, reliable and positive member of a small busy team.
- Demonstrate understanding of best practice in a well-equipped technical laboratory in terms of precision, adherence to testing protocols, date recording and cleanliness.

This is a hands-on role. An attractive package will be offered to the right candidate, along with a customised training programme. Candidates should send their CV accompanied by a personal statement to:
